

HCE Global and the Center for Improvement in Healthcare Quality (CIHQ) Collaborate to Improve Regulatory Compliance.

About the Collaboration

CIHQ strategically partners with organizations that will provide value to their member health systems and hospitals. Healthcare Consulting Experts help providers to comply with complex regulatory requirements. Through discovery analysis, experts do a deep dive into Emergency Preparedness, Risk Management, Infection Prevention and Quality Assurance Programs to identify strengths and weaknesses.

About CIHQ

The Center for Improvement in Healthcare Quality (CIHQ) is the nation's fourth accreditation provider approved by CMS to deem hospitals as meeting Medicare Conditions of Participation. CIHQ also accredits Free-standing Emergency Centers and Congregate Living Health Facilities. The Federal Register will announce CIHQ's accreditation authority for Critical Access Hospitals in May 2023.

Our programs strive to ensure that patients receive care in organizations that exceed minimum standards set forth by the federal government. CIHQ is committed to helping hospitals improve the quality of care rendered in their community by providing the tools and support they need in a collegial, respectful, educational, and cost-effective manner.

About HCE Global

Our consultation experts are certified by the Center for Improvement in Healthcare Quality (CIHQ) for CMS and Physical Environment and by the Certification Board of Infection Control and Epidemiology (CIC). With over 30 years of experience our experts have actively participated in all aspects of accreditation surveys. They will identify high-risk areas and help to make improvements to mitigate risk. Our goal is to help providers with regulatory compliance concerns through guidance and real-time, practical solutions.

HCE Global provides leadership training. We recognize training and education are ongoing. We provide educational services to help organizations stay current on matters related to regulatory compliance. We can customize educational programs to meet your organization's specific needs.

HCE Global also provides Environment of Care and Life Safety regulatory guidance on everything from blueprints to finalization of projects for both new projects and existing healthcare facilities.
